Bing: 100 Sprints To Math Success

Rolling 100 is a great game to play with your young learners in Grades 1–3. The game reinforces several concepts, including addition, subtraction, and place value. It also helps your child develop number sense and gain flexibility with numbers. But don't let all that learning intimidate you!

GRADE 5 BOOK OF SPRINTS - Mrs. coronado - 6th Math

Like projects, Sprints are used to accomplish something. Each Sprint has a definition of what is to be built, a design and flexible plan that will guide building it, the work, and the resultant product (Scrum Guide, 2014). For decades, the criterion for the success of software development was the golden triangle of the Manager (Time, Cost, Scope).

Sprints: Sprint fluency activities in Eureka Math Practice build speed and accuracy with already acquired skills. Used when students are nearing optimum proficiency, Sprints leverage tempo to build a low-stakes adrenaline boost that increases memory and recall. Their intentional design makes Sprints inherently differentiated - the problems ...

Agile and efficient: How user stories power successful sprints

Sprints are not your typical timed test. Students compete against themselves to improve the number of problems completed in one minute. Then the sprints are thrown away, not recorded in a grade book. They are practice. Period. And just one way to practice math facts. Do Sprints harm students or cause math anxiety? Not when administered correctly.

Sprints are just one simple way that students can improve their mental math skills.

Student Print Materials (K-5) - Great Minds | Math | Overview

I often find that teams do high level story point estimation and load their sprints based on how many story points they average per sprint. In my opinion story points only tell us which stories go into sprint planning. During sprint planning the team will break down the work to the point of understanding what each functional area or individual has to do at the task/hour level.
